

## Information for using rondo resin remover on rondo cylinderhead drill and switchblades

### rondo 600 HL resin remover

Self - working, alcalic resin remover and cleaner for all wood cutting tools.

### rondo 600 HL resin remover

is a product for fast and easy removal of resin on saws, routing- and drilling tools as well as plane blades.

### Qualities:

rondo 600 HL resin remover is free of poison or acid, non smelling, not inflammable and ecologically reasonable.

rondo 600 HL doesn't develop narcotic or dangerous vapors or gasses.

Since rondo 600 HL is free of acid, it cannot turn into hydrogen.

Tools may be left in rondo HL 600 overnight to be clean the next morning.

### How it works:

resin, oil, grease, wax, dirt and light oxidation will be removed in a minimum of time.

rondo 600 HL also removes glue, lignin and synthetics off drills and blades.

### How to use it:

rondo 600 HL is highly concentrated and needs water added. Depending on thickness of resin or dirt, use following chart to dilute the concentrate with water.

Applying	rondo 600 HL: Water	reaction time in by minutes
bathing :	1 part : 5 - 10 parts	5 to 30
spraying :	1 part : 4 - 10 parts	2 to 5
by brush :	1 part : 5 - 10 parts	2 to 5

After dirt and resin are removed, tools must be rinsed in water, dried and oiled.

rondo 600 HL can size: 5 litres
